Intro

Following is a list of many dozens of chronologically organized news reports (about 175 at the moment), mixed with a few undisputed declassified government documents, covering a period from 1942 until today. Close to 100 percent of these articles can be considered mainstream, although this doesn't mean that always reliable individuals are cited, especially as the decades pass. Warnings are provided in these cases.

2017-2020s: DOD acknowledges UFOs exist - yet disinformers lead the way

Updating with legitimate articles has become virtually impossible today. Even the 2017-2023 period in which the media, Pentagon and congress started to take UFOs "seriously" is riddled with Coast to Coast AM-tied UFO disinformers. We discuss this in a section of the Coast to Coast AM article, and for the rest stop trying to update this section. Looking at how congress' in 2023 actively hid that TikTok was owned by CFR and Davos-tied western corporations, instead of by the *"communist Chinese government"*, already showed that congress is filled with actors. Them working with Coast to Coast AM disinformers to manipulate the facts on UFOs really shouldn't come as a surprise.
